

## 9 o'clock

**I:**

C C/H  
9 o'clock, i wake up, in the morning  
B A  
with a backup of my thoughts from yesterday

C C/H  
in my head an explosion evry second  
B A  
feel my eyes getting pushed outside their homes

C C/H  
i have slept for a few useless houres  
B A  
try to re-organise my stupidity

C C /H  
why can i, not fall back for a long time  
B A  
in the black that surrounds me in the past

**REF:**

F C  
i'm afraid of the sun,  
Gis C  
im afraid to fall asleep  
F C  
i don't know when it has begun  
Gis G

**II:**

C C/H  
when i try, to get up, then i fail  
B A  
for the first two or three hundred times

C C/H  
every look that i take outside the window  
B A  
seemed created to abuse this attempt

C C/H  
i know for sure, that my behaviour  
B A  
is a little little little little little bit misplaced

C C/H  
every mental argumentation architecture  
B A  
brainstorming will be doomed to collapse
